

CARA

Fast, friendly and flexible User Interface for Documentum, Oracle WebCenter and Alfresco. Full configuration toolsuite

What is CARA

CARA is an fast, friendly and flexible User Interface for Documentum, Oracle WebCenter and Alfresco. It is powered by a full business rules configuration toolsuite with extensive customization capabilities

Searching made easy

With 7 different ways to search or navigate, CARA provides quick ways for users to get their information; from instant type-ahead results through dynamic folders to filtered reports, never lose anything again

It's Personal

CARA allows definition of different views and user experiences for different groups / profiles – and users can then further personalize their experience, seamless across devices and browsers

Feature rich

CARA offers not only the full range of features from each underlying repository, but also adds a wide array of additional functions including the new replacement for Java Applets, the CARA Plugin, and full customization

Fast to deploy

CARA can be configured on top of your existing environment, or in a new environment, and made ready to go within a day. Ongoing upkeep of the system is similarly streamlined, reducing costs

Content Management made simple

Key Features

Personalization

Everyone works in different ways – so users in CARA are able to make choices and changes to the way CARA looks and works for them, and these are saved automatically and used wherever the user logs in, including mobile.

Flexible Navigation

Users can build their own navigation tree (“Dimensions”), choosing what each level maps to. Admins can set up more complex queries to display as navigable trees (“SnapLists”) – e.g. “Show me my department’s documents which expire in 30, 60, 90 days”.

Widgets

One-click display of information about a document – choose from core set (e.g. properties, workflows, thumbnails) or create your own, linking in any web service as a widget e.g. information from another system. See multiple at once, and personalize them with drag & drop.

Different views for different users

Define different views for different user groups / usage scenarios. Specify different properties, widgets, filters, colours, searches and other options, allowing users to work in the way that best supports their processes.

Key Features

Simplified User Experiences

Not all users need all features; have occasional users login directly to a single Inbox view, or a company SOP search portal, or an external contributor upload site, through simple configuration.

Dashboards / Reports

Don’t let your metadata go to waste – use it for reporting on project progress, metrics, and more. Show the results as tables, charts or graphs, and export it all to Excel.

Extending core features

CARA provides access to all the core features of the underlying system, while offering extensions and improvements to many of them, for example virtual documents and workflows.

Fully Configurable AND Customizable

CARA has a rich set of configurations, which allows setup of use cases from SOPs to Media Marketing to Government or Engineering systems. But CARA can also be fully customized – add any menu item, custom screen and define the processing (queries, API, server method, RESTful web service, JavaScript), but package it in our unique “Configurable Customization” wrapper to ensure future upgradeability without re-coding.

Top 20 Life Science company implements CARA across the enterprise e.g. SOP / Quality, through Regulatory Correspondence, Pharmacovigilance to Archiving and Technical Documentation

Global television network uses CARA for managing its marketing information, tracking pricing of products at competitors and dashboarding the efficiency of the time-to-broadcast process

Use Cases

CARA was selected by a global insurance company to provide the end user interface on top of Documentum for managing claims and promotional materials documentation

Top 5 global Life Science company selected CARA as an enterprise wide tool, e.g. Regulatory Submissions documents, SOPs / GxP documentation and Legal Affairs
