Top Tier Pharma Company

>5000 Employees

Lots of global partners

Collaborate on different medical products

Ongoing projects where the scope can change

Problem

Have multiple systems for different departments: Reg Submissions, QMS, PV

Needed a platform to unify this information keeping the vocabularies and security from their R&D process

Don't have a secure method for exchanging information and simultaneous collaboration

Solution

CARA Hub acts as intermediary between their other systems and their external partners to bring together information from their reg, quality and safety departments

Full suite of **CARA™ Platform** capabilities in a secure, private cloud environment

The content never leaves the platform so they can stay compliant, and all activity is auditable

cara HUB

Large Financial Services Enterprise

North American Mortgage company

Partners with varying levels of organisational maturity

Strict information sharing regulations due to sensitive personal data

Problem

Have multiple partners who don't have their own security and compilant processes in place

Need a platform where they can securely share contracts, cases and other personal data

Want to have independent control of their partners without vendor assistance

Solution

Each partner can only see the information relevant to them

Information doesn't leave the hub so they can remain compliant

No extra cost to the partners and no need to rely on their limited architecture

Easy to add and remove partners with predefined types, security controls and views

cara HUB

Clinical Research Organisation

Partners in multiple locations with different maturity level

Numerous ongoing projects

Problem

Has to abide by health authority regulations

Don't have a way of monitoring projects with different partners while keeping their information separate

Solution

CARA Hub maintains industry standards for Life Sciences so it's easy to adhere to GxP regulatory, quality, safety and clinical processes

Maintain information separately but on the same platform in case some of the partners are competitors

cara HUB

Large Multinational Corporation

Acts as umbrella company for smaller companies they acquire

Regulated industry

Central headquarters oversees operations

Problem

Has acquired a number of smaller companies who are still operating under different names with different management

Wants to have access to all of their information without them accessing each other's

Need an easy way to manage this

Solution

Used as a central point to manage all ongoing acquisitions

Once the contract is signed, permissions and access can be easily changed to a different type

Maintain information separately so companies can continue to function independently within the parents (host) company
