

CARA in Government

CARA's leading information management platform is ideally suited to government requirements. Our integration with ArcGIS/ Google Maps adds a new element to data management in CARA. Users can view their data side by side with locations.

- Store permits and **manage land parcels**
- Keep records of land ownership
- Manage data values including **location based data** such as parking zones, and Police dispatch data.
- CARA Mobile app to provide easy access to data and files **on the go**.
- Integrations with other leading software via APIs
- QR Codes + Barcodes can be generated for all tracking needs.
- Management of Documents and Data.
- E-Signature capabilities via CARA e-signature or **DocuSign/AdobeSign**
- Notifications via mail, slack or internally within CARA.

Integration with ArcGIS

CARA's integration with ArcGIS enables side by side viewing of parcels and the associated data. City planning, tracking land ownership and viewing land boundaries are just a few of the potential use cases for this capability.

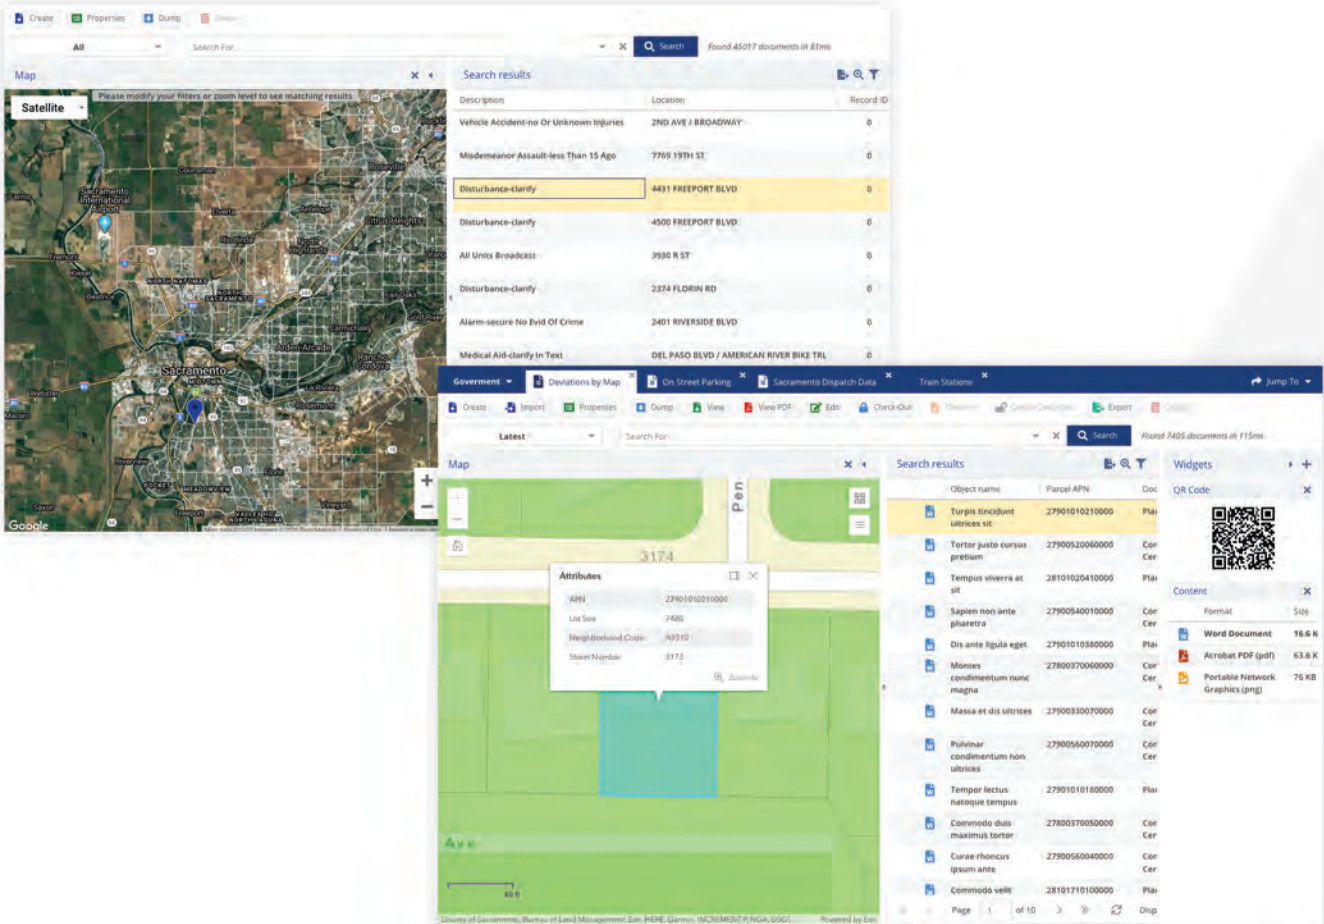

CARA on the go

Many people work on the go and need instant access to their files. The CARA mobile app enables quick and easy access to valuable data on mobiles and tablets.

Advanced Searching and Reporting

Never lose your content again. With filters, metadata based search, full text search and advanced graphical reporting amongst some of the features, users have countless ways of finding their content and viewing vital information.

The CARA maps integration provides rich location-based data visuals.

Pure SaaS

All our of New CARA solutions are cloud-first, providing the simplicity and security of a fully-managed service. Backed by global content storage leaders, you can be safe in the knowledge that your content and information is protected by cutting-edge technology in a private cloud.
