

Transforming complex business processes for companies in regulated industries.

Legacy application backlogs can be addressed and enhanced with modern technologies offered through cloud-native platforms, enabling an organization to react quickly, and thus be more competitive.
- Gartner® 2021

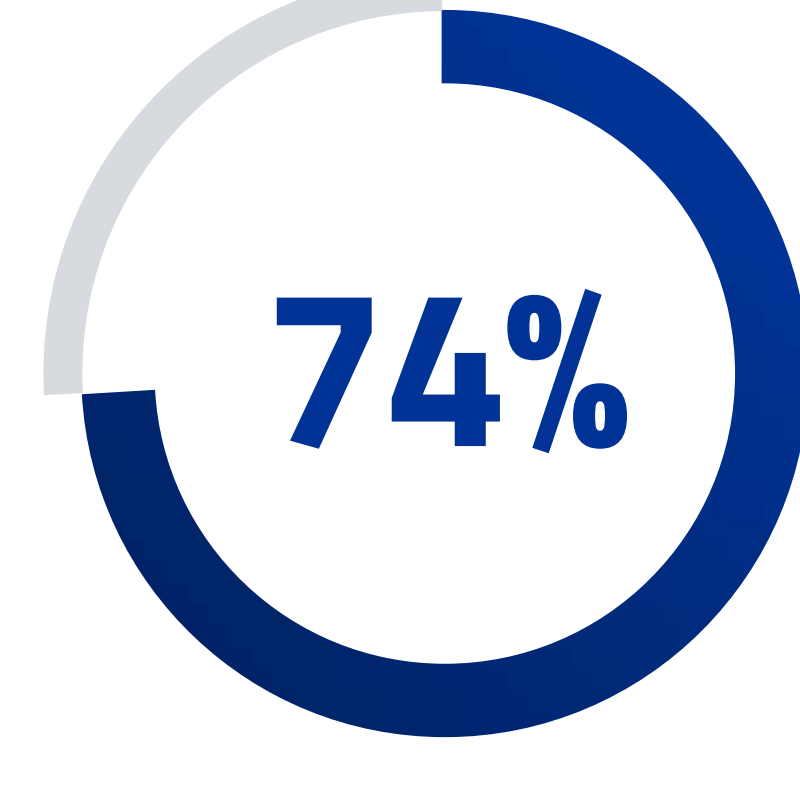

TEKsystems 2023 'State of Digital Transformation' report found that:

Navigating complexity of current environments and siloed behaviours was the No.1 challenge faced when navigating digital transformation

38% of respondents' top digital transformation goal is to **transform business processes**

74% of respondents stated Reduced Costs and Improved Efficiencies as a top focus of digital transformation

CARA Platform

CARA removes the technological and financial drawbacks of a network of separate legacy systems – instead, our customers can consolidate their complex regulated business processes, data and content onto a single, compliant, cloud based platform.

Enterprise Content Services

The ultimate compliant platform. CARA replaces dozens of document management systems with a content services platform, applying compliance, authoring, transformation, collaboration, security and audit traceability in one place.

Business Process Management

Modern Business Process Management with CARA removes checkpoints, delivers accurate information quickly, and automates repetitive tasks so that your teams can work quickly and focus on the work that really matters.

Enterprise Data Management

Take a holistic approach to managing your data and drive better decision-making across the entire organisation, with Enterprise Data Management on the CARA Platform.

Security

CARA was created for strictly regulated markets – Multi-factor authentication and SSO control access to the platform, while fully configurable security rules based down to the individual role, group, and user ensures your colleagues and partners can access only what they need to do their job.

The managed aspects of cloud-native platforms help shift IT resources toward value-adding outcomes by reducing the infrastructure burden.
- Gartner® 2021

Compliance

Ensure total compliance across the enterprise with the CARA Platform. Meet industry standards like: GDPR, HIPAA, DICOM, GxP, and other data models. Everything is auditable, from individual document changes, to user activity, workflows, versioning, and lifecycles.

Cost

With competitive pricing and our team to help you manage migration, we guarantee an efficient and cost effective process

Scalability

We manage clients' subscriptions based on their usage, meaning there's no need to worry about investing in new servers and managing further installations as your company expands. CARA simply scales with you.

! CARA saved users more than 60 million hours in 2023.

Increase efficiency

Our enterprise-wide information lake replaces a complex IT landscape, so users can create, locate, and re-use information instantly in any process across the organisation.

2 Billion documents and data objects are currently managed in CARA.
