

Business Case Support

The CARA Platform is the single, unified platform for Enterprise Data, Content and Process management, all provided with a single license fee. CARA eliminates the need for a complex IT landscape and costly legacy systems; allowing organisations to consolidate their network of point solutions and processes onto one platform. Fully compliant and auditable, CARA is specifically designed to enable organisations to meet regulatory requirements.

Strategic challenges faced by regulated organisations today

Challenges

Your organisation may be facing some, or all of these challenges – driving the need for a robust business case to spark the transformation of your systems & processes.

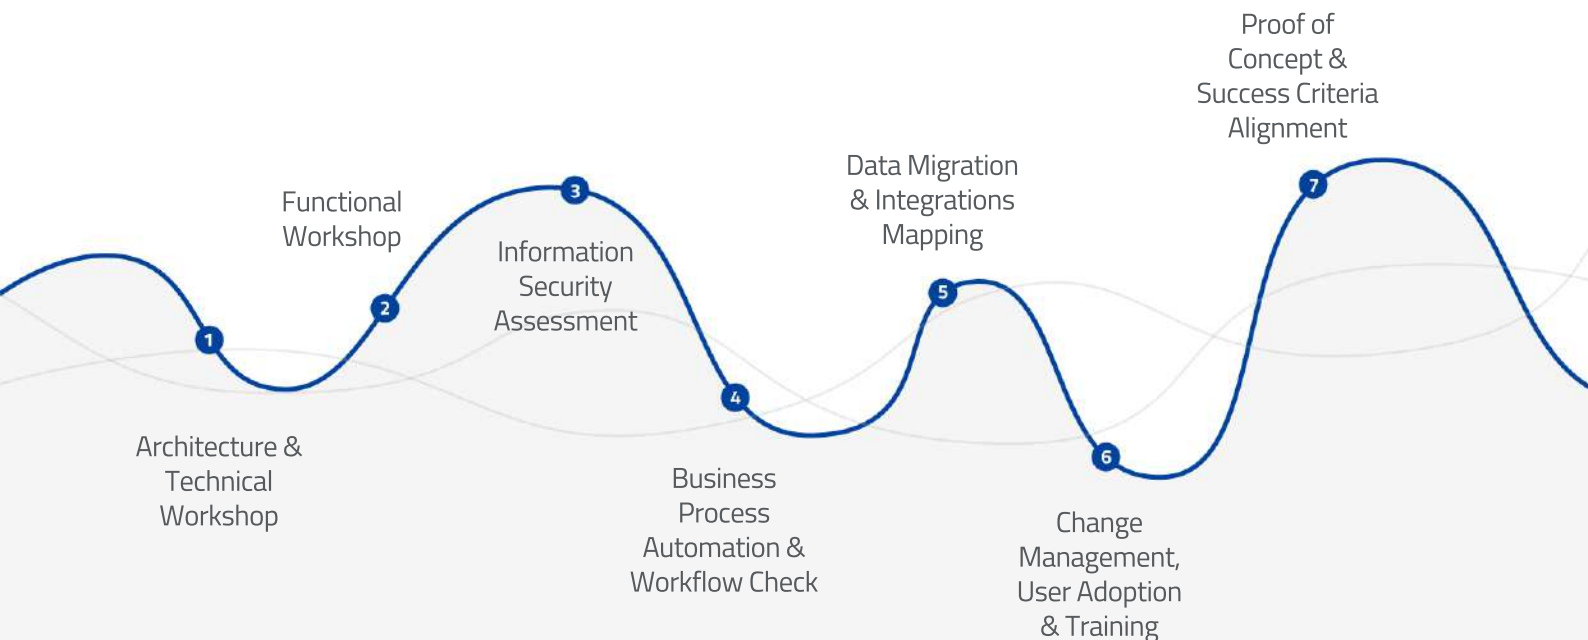

- Your current solutions do not meet your business, users, or clients' requirements
- Digitisation and further automation is being held back due to a complex, custom IT landscape
- Your current IT landscape seems too complex to migrate away from
- Current and new process & data related compliancy and regulatory requirements pose a challenge
- Further globalisation, speed to market, and scaling as required is being blocked
- No clearly defined long-term digital strategy
- Lack of clear insight in your data's value, locations, usage and potential risks & opportunities

Goals

- ✓ Enabling a digital transformation strategy to shift away from legacy or high maintenance, high cost, complex solutions.
- ✓ Defining the right solution based on technical, functional, architectural and regulatory requirements.
- ✓ Alignment between enterprise stakeholders, departments, business and user requirements.
- ✓ Providing a clear business case blueprint for management review.

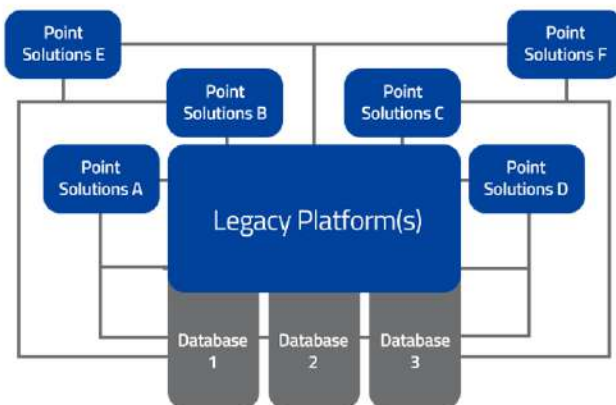

CARA Business Case Blueprint

Deliverables

- ✓ Business Case 5 Year TCO (vs. current solutions)
- ✓ Project Implementation & Licensing breakdown
- ✓ Business Process Optimisation overview
- ✓ Data Migration Blueprint
- ✓ Architecture / Technical / Functional blueprint documentation
- ✓ Proof of Concept Environment

How does CARA simplify your IT landscape?
