

Cloud Readiness Assessment

For enterprises moving from on-premises solutions to the cloud, the Generis Cloud Readiness Assessment offers a structured, comprehensive approach to streamline this complex transition, whether you're transitioning from on-premises or scaling existing cloud resources.

As the solution provider, we bring unmatched expertise with over 20 years of experience and tailored recommendations, backed by seamless access to Product Management, Engineering, and Customer Support. Each step of your cloud journey is supported by Generis's direct insights and dedicated assistance, ensuring a smooth, well-coordinated migration.

Your path to a successful Cloud Transition

The Generis Cloud Readiness Assessment ensures a seamless, effective transition to the cloud with clear, actionable benefits, here is how we do it:

Clear Migration Roadmap

Structured guidance from preparation to execution covers every stage of migration, ensuring an organised, well-supported shift to the cloud.

Scalable, Secure Architecture

Receive a tailored architecture designed for scalability and security, ready to support both current and future needs.

Minimal Disruption

Expert support minimises operational impact during data migration, protecting business continuity. Coupled with telephone and online support to maintain 24/7 cloud operation. Uptime 99.5% (typically our rolling upgrades of each server in an HA environment mean no server downtime is required).

Aligned Scope and Objectives

Defines a clear scope, verified by IT and business teams, keeping all stakeholders aligned on objectives.

Seamless System Integration

A comprehensive plan ensures compatibility with systems like SAP, Salesforce, and DocuSign, for a unified landscape.

Meeting your needs at every step

Our Cloud Readiness Assessment delivers clear, actionable results to ensure a smooth transition to the cloud:

- **Migration Strategy:** Step-by-step guidance on how to prepare, execute, and support the migration of your solutions and environments.
- **Tailored Cloud Architecture:** Draft architecture designed for current needs and future scalability, with security at the core.
- **Data Migration Plan:** High-level options to migrate your data seamlessly, minimising business interruptions.
- **Defined Scope Alignment:** Clear documentation of the functional and technical scope, verified by your IT and business teams.
- **Integration Plan:** Detailed configuration for seamless integration with systems like SAP, Salesforce, and DocuSign.
- **Final Review:** A comprehensive presentation of findings with a Q&A session to align all stakeholders.

Our Cloud Readiness Assessment usually takes 2-4 days to complete. The duration of completion depends on factors such as integrations involved, the intricacy of the organisation's IT infrastructure, and considerations including location, product ecosystem, and existing system integrations.

Cloud adoption is more than migration—it's about achieving continuous value. Our fully managed and on-demand support ensures your cloud solution remains optimised and ready to support your growth, for years to come.
