

The Content & Information Management Platform for Regulated Industries

Engineering

Financial Services

Government

Life Sciences

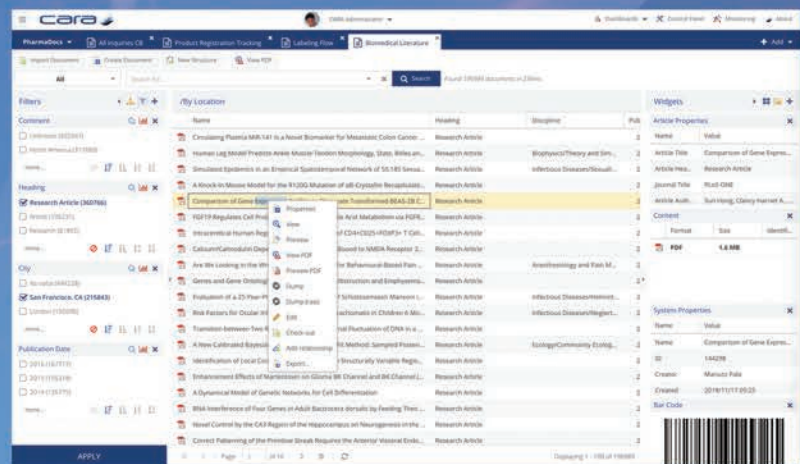

Media

Utilities and Energy

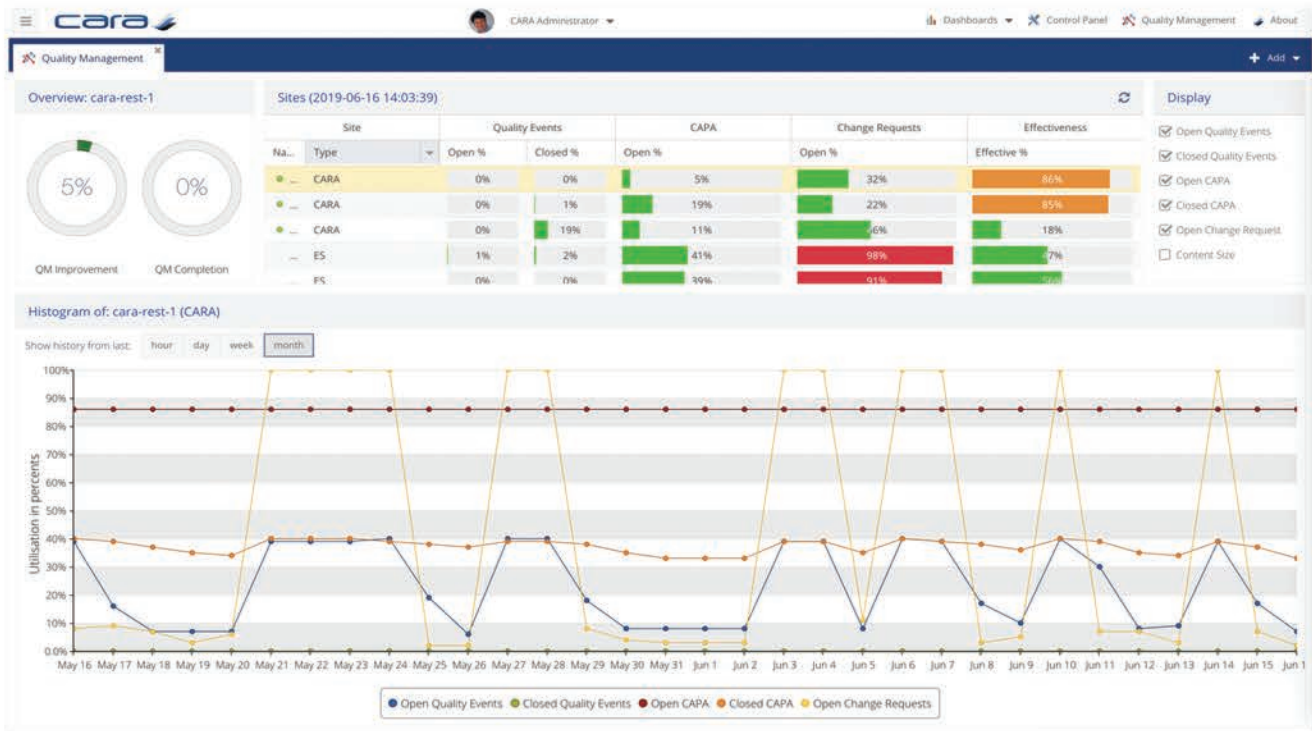

CARA is a cloud-first platform providing functionally-rich solutions for regulated business processes, including a comprehensive end-to-end platform for Life Sciences.

CARA was created as a pure Content Management solution in 2003. With almost 2 decades of experience and customer-driven development, CARA is the ultimate tool for regulated business processes.

- ✓ Simple, Flexible and Feature-rich User Interface
- ✓ Fully Configurable Metadata with Reduced User Input
- ✓ Unprecedented Performance with Powerful Search Options
 - ✓ Group-based, Conditional, Granular Security
- ✓ Flexible, Powerful, and Interactive Reporting with Dashboards
 - ✓ Configurable Tasks including Multi-Step and Automated
- ✓ Full Lifecycle & Version Control for Tracking Content through a Process

Data Management

Information belongs together. Manage your enterprise product data and content in the same platform.

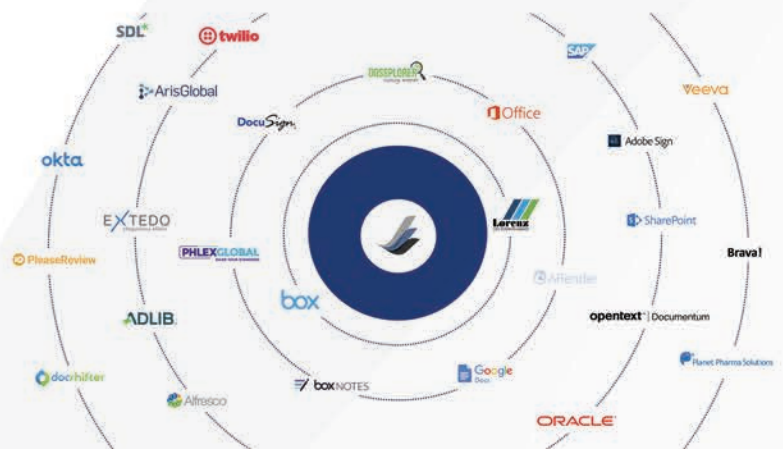

- Detailed, Interactive Data Reports
- Case & Event Management with Process Flow Guidance
- Single Entry, Unlimited Re-use across the Platform (Including Integrated Systems)
- Highly Configurable Data Forms
- Master Data and Product Information Management
- Intelligent, Cumulative Dictionaries & Taxonomies

Enterprise Central Source of Truth

CARA is designed to serve as a seamless platform for all regulatory application requirements. However, we realise that there are other applications and many tools that your business relies on.

The concept of a central source of truth is to create a single place to access all that content and data regardless of where it is stored and managed.

While a particular business group may use a particular tool for their niche process, that content and data is available in CARA to be tracked, managed and re-used across your business.

- Search & Report Across the Enterprise
- Prevent Content, Information, and Effort Duplication
- Provide a Central Authority
