Sign on any device with AdobeSign

Sign from mobile phones, tablets, or computer browsers without installing any additional software

Track

Use CARA Dashboards to track the status of signatures across multiple documents

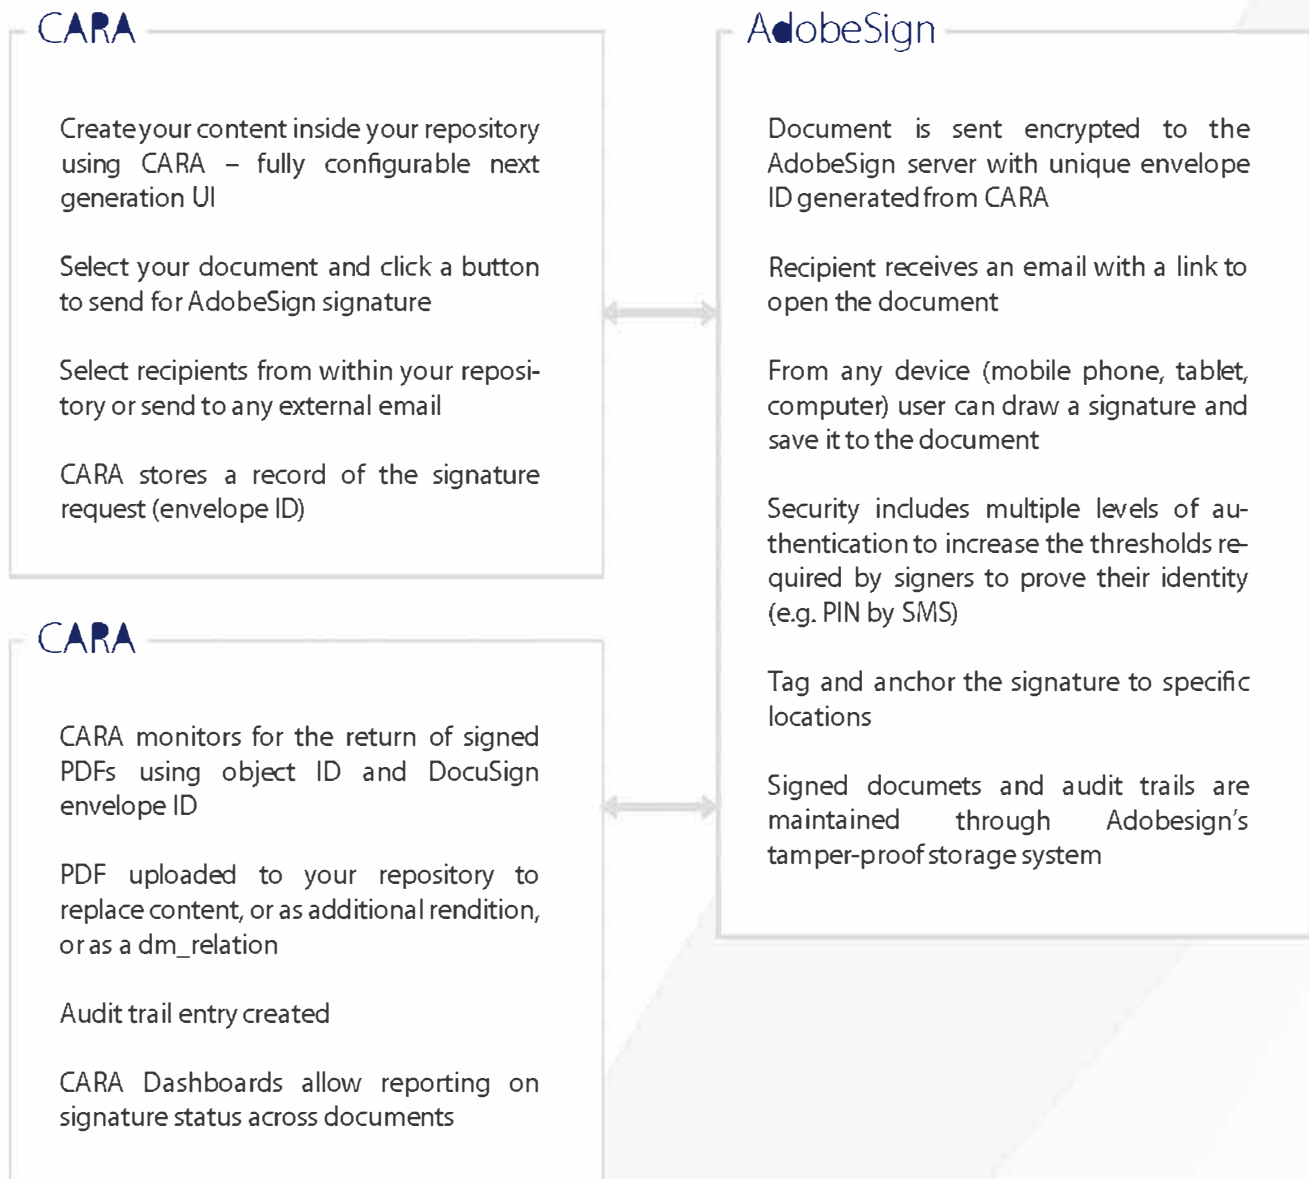

Attach signed PDF in your repository

CARA will import the signed PDF from AdobeSign to the repository as a rendition

Compliance made simple

It is increasingly important to be able to ensure compliance on all kinds of business-critical content, from patient healthcare records, to government applications, and legal or, human resources documents. CARA provides the best of breed content management user interface and configuration / business rules layer for creating content, and AdobeSign lets you sign documents electronically and easily send documents for electronic signature in a safe, secure, and legally binding manner.

Optional Validation Pack

- We can provide Validation documentation for CARA and AdobeSign.
- Enables customers to meet industry regulations such as 21 CFR Part 11.
- Reduces the time to deployment of a fully validated solution.
- We provides additional project management / implementation services.
