Validation Accelerator Pack

The USDM Cloud Assurance provides customers with an accelerated path to validated implementation

Compliance made simple

It is increasingly important to be able to ensure compliance on all kinds of business-critical content, from patient healthcare records, to government applications, and legal or, human resources documents. CARA provides the best of breed content management user interface and configuration / business rules layer for creating content. DocuSign allows you to sign documents electronically and easily send documents for electronic signature in a safe, secure, and legally binding manner.

Optional USDM Cloud Assurance

- USDM provides a VAP (Validation Accelerator Pack) for CARA and DocuSign.
- Enables customers to meet industry regulations such as 21 CFR Part 11.
- Reduces the time to deployment of a fully validated solution.
- USDM provides additional project management / implementation services.
